RE: Reference

To whom it may concern:

Our relationship with Dorian Huber Interiors began four years ago and involved the purchase of a sofa and some pillows. From there, the relationship grew exponentially. Dorian advised us on the purchase of a new home and oversaw a sizeable renovation project. His firm was involved in every aspect of the renovation, from design decisions, to the coordination of all of the contractors and all quality control. When the renovation was completed, Dorian and his team even hung our paintings!

At present, we are planning to construct a pool, pool house with a kitchen and showers and to add a new garage to the house. Once again, Dorian and his team can handle the project from start to finish - all discussions with the council, all of architectural design, all of the garden design as well as once again serving as the project leader.

As a foreigner living here in Switzerland, I find Dorian Huber Interiors' services priceless. He and his team are personable and wonderful with whom to work. Dorian knows how to "get the job done," - who to call, who are the best contractors, who provides the highest quality services. He then oversees their work and ensures that all work is of top quality. Once design decisions are made, my husband and I do not have to get involved, he handles the entire project. That is the true luxury of using Dorian Huber Interiors. In our opinion, you truly get what you pay for, once design decisions are made, the customers' work is finished!

I cannot recommend the firm highly enough.

Best regards,
Alexis J. Margreiter
